Drawing Items to Confirm

- Overall width, usable width, belt path, rod layout, pitch, edge structure, and running direction.
- Drive method, sprocket details, drum diameter, product load, line speed, and operating temperature.
- Material grade, surface requirement, cleaning method, installation space, and replacement urgency.

Matched Components

- Sprockets, drums, support rails, return path, and clearance points should be reviewed together with the belt.
- When replacing an old belt, send old belt photos and any visible wear points before quotation.

Review Outcome

- YIYI reviews drawing, photos, application conditions, and packing requirements before confirming quotation direction.
- Third-party factory visit or inspection support can be arranged when required by the buyer.

Privacy note: drawings, old belt photos, project dimensions, shipment photos, and buyer records are used only for technical review and quotation preparation. Public materials do not include customer names, order numbers, shipping marks, private labels, or faces.
