Required Photos

- Full belt overview, top surface, underside, left edge, right edge, drive area, return path, and damaged section.
- Close-up of rod connection, chain link, sprocket engagement, welded point, side plate, or edge hook if applicable.
- Photo with ruler or caliper for pitch, width, rod diameter, chain pitch, and plate dimensions.

Required Measurements

- Overall width, usable width, rod diameter, rod pitch, spiral pitch, chain pitch, belt length or section length.
- Running direction, drive method, sprocket tooth count, drum diameter, load, speed, and operating temperature.

Common Replacement Risks

- Old sprockets may be worn even when the belt dimension looks correct.
- Copying only the old belt can repeat the same failure if system alignment or drum fit caused the damage.
- A replacement review should confirm belt structure and drive components together.

Privacy note: drawings, old belt photos, project dimensions, shipment photos, and buyer records are used only for technical review and quotation preparation. Public materials do not include customer names, order numbers, shipping marks, private labels, or faces.
